# National Development: City of Mount Vema construction, step-by-step guide

---

**July 06, 2021** – The Mount Vema Ministry of National Development and Land Maintenance has unveiled the step-by-step guide of the City of Mount Vema development schedule to help participants understand each phase of the project.

As Mount Vema moves from planning to field and site works, His Mount Vema Majesty's Government wants to clarify that Vema Seamount, its marine life and its adjacent waters remains a Sovereign Territory in accordance with the Declaration of Sovereignty, with or without the City of Mount Vema which is a project that will add value to what will remain collectively known as the Kingdom of Mount Vema or simply Mount Vema.

Field and site works will take place outside Mount Vema and will move gradually to the Vema Seamount Territory by sections as follows:

## **Stage 1**

The stage 1 will include the construction of (a) The Breakwaters to be adjacent to the 5<sup>th</sup> Avenue South section; (b) The Breakwaters to be adjacent to the 5<sup>th</sup> Avenue South East section; (c) The Breakwaters to be adjacent to the 5<sup>th</sup> Avenue South West section; (d) The Breakwaters to be adjacent to the 5<sup>th</sup> Avenue East Central section; (e) The Breakwaters to be adjacent to the 5<sup>th</sup> Avenue North East section; (f) The Breakwaters to be adjacent to the 5<sup>th</sup> Avenue North West section; and (g) The Breakwaters to be adjacent to the 5<sup>th</sup> Avenue North section.

## **Stage 2**

The stage 2 will include the construction of (a) The docklands of Pashant Road and Southland Road; (b) The docklands of Mount Vema Boulevard North; (c) The Gate Bridge; (d) The Port of Mount Vema; (e) The docks of the Floating Airport; and (f) The Marina – Yacht Harbour.

## **Stage 3**

The stage 3 will include the construction of (a) The City of Mount Vema Central Park; and (b) The City of Mount Vema Resort. Note: These two sections are separated from others due to the delicate work required. The two projects

require soil and sand, so each section of the project will have especially designed foundation structures so the marine life in those specific locations is not affected in any way whatsoever and will maintain some level of natural light, create a new environment to monitor, preserve and enable any form of marine life to flourish.

### Stage 4

The stage 4 will include the construction of (a) The Racing Track; (b) The Olympic Gardens; and (c) The docks of the 10 Districts of the City of Mount Vema.

### Stage 5

The stage 5 will include all the floating homes, apartments, and facilities that will make the floating City of Mount Vema.

Note: Some stages of construction, will be carried out concurrently with other stages but others may be kept as scheduled, as they may depend on the completion of other developments.
