

A drink made from pureed raw fruit, vegetables, and spirulina from Mount Vema

August 24, 2021 – A new healthy food drink will be introduced by Veman Food & Beverage, the food and beverage company of Mount Vema to be sold first on GolleMARKET and to be later distributed on the worldwide market.

The drink will be a green smoothie and the first to contain spirulina directly sourced from Mount Vema, as a dietary supplement which will make it whole food with all the basic dietary ingredients for adults, as well as whole food for children.

Three different types of smoothies will be introduced. One with dairy products, another with non-dairy products and the other will be green smoothies. The drinks are yet to be approved by the FMA (Food and Medicines Agency of Mount Vema) a division of the Royal Mount Vema Department of Health which is also known as the Health Authority of the Kingdom of Mount Vema

All indicates that the products could be approved before the end of the year, and when approved, Veman Food & Beverage said it will be ready to start mass production starting with its green smoothie.

The green smoothie drink will consist of healthful ingredients such as green vegetables that includes spinach, kale, swiss chard, collard greens, celery, parsley, broccoli, with some fruit, and spirulina directly sourced from Mount Vema.
